

**THE MACHINE
& SKILLS COMPANY**
RAPID INDUSTRIAL DEPLOYMENT MODEL

TRAINING THAT DELIVERS WHAT GOVERNMENT ALREADY NEEDS

We Deploy Operational Fabrication Systems Where Training and
Production Happen at The Same Time — Within 90 Days.

BUILT FOR EXECUTION

We focus on execution — turning existing priorities into operational systems quickly and efficiently.

Our approach aligns directly with current government needs, delivering outcomes without disruption to existing structures.

We operate within established frameworks to deliver practical, measurable results.

We are structured for delivery.

WHAT THIS IS

A DEPLOYMENT SYSTEM NOT A PROGRAMME

This is not a training initiative.
This is not equipment supply.
This is not infrastructure development.

This is a system that converts demand into:

- Operational Production
- Trained Workforce
- Finished Goods
- Training Happens Inside Production.
- Highlighted Statement:
- We Deploy. We Activate. We Deliver.

FROM SETUP TO FULL OPERATIONS IN 90 DAYS

Within 90 days, each deployment delivers:

A fully operational fabrication centre Installed and active
production equipment First production output completed
First cohort trained on real production tasks Quality
systems and workflows in place Active local supply chain

At the end of 90 days, the system is operational.

TWO ENTRY POINTS INTO THE SYSTEM

Option 1:

Training Within Existing
Production System

Send trainees to our
Lagos facility.

Participants are trained
through direct
involvement in live
production across
multiple sectors.

Option 2:

Full Deployment to Your
Location

We deploy a complete
fabrication and training
system within 90 days.

Includes:

- Machines and equipment
- Facility setup
- Instructor training
- Production activation

Both options lead into the
same operational system.

Aligned with Existing Government Needs

- Transport & Mobility Systems
- Electric vehicles, minibuses, and transport solutions
- Agricultural Mechanization
- Farming and processing equipment
- Education Infrastructure
- School furniture and institutional fittings
- Industrial Fabrication
- Metal structures and custom production

Each deployment responds directly to existing demand.

HOW TRAINING HAPPENS

Training is delivered through direct participation in production.

Operators are trained on:

- Design and Technical Drawings
- Machine Operations
- Welding and Fabrication
- Assembly and Integration
- Quality Control
- Production Workflow
- There Is No Separation Between Training And Output.

Every trainee contributes to real production.

ACCESSING THE PLATFORM

We provide multiple pathways:

- Full system deployment
- Training access programmes
- Machine supply and setup
- Hybrid partnerships
- Each pathway connects into the same system.

BUILT FOR SCALE

The platform includes:

- Structured Training Content
- Design Templates
- Production Standards
- Performance Tracking
- Remote Support Systems
- This Ensures Consistency And Scalability Across All Locations.

MEASURED OUTCOMES

Each deployment delivers:

 **1,000+**
Trained Operators Annually

 **50-100**
Direct Jobs

 **200-300**
Indirect Jobs

continuous production output Across multiple locations, this builds long-term industrial capacity.

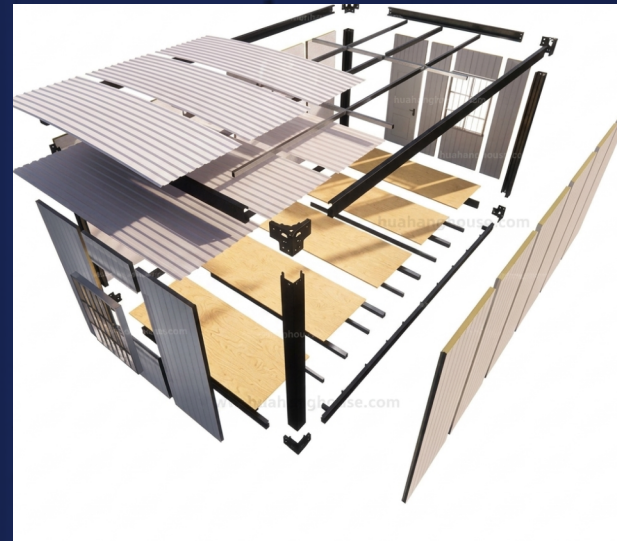

The focus is on results.

SIMPLE ENGAGEMENT PROCESS

Steps:

- Initial Engagement
- Needs Assessment
- Proposal & Agreement
- Deployment / Activation
- Ongoing Support

Clear steps. Defined outcomes.

READY FOR DEPLOYMENT

We are execution-focused, with systems already designed and ready to scale.

We do not redesign systems — we activate them.

We do not operate in theory — we deploy in real conditions.

Engage with us to activate your deployment.
